## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1 and 8 are rejected under 35 U.S.C. 102(a) as being anticipated by

Overall P.N. 6,552,542.

Overall discloses a Magnetic Resonance Imaging method that is a modified SSFP pulse sequence. The pulse sequence described in connection with Fig. 1B and 2A-B, applies a selected pattern of RF pulses having varying phases. The RF pulses are equally spaced with respect to each other and as a pattern.

### ***Allowable Subject Matter***

3. Claims 2-7 and 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

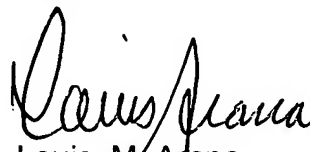

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Overall '651, Yamazaki et al. and Henning all disclose SSFP imaging sequences. Note the abstract and drawings of each of the disclosures.
